## Transport X

# Transport X Firmware Updates

### Introduction:

This rolling release table describes the main releases of the Transport X firmware to date, with a brief description of the change's.

Release #	Release Date	Key features/developments/improvements
v1.12.6.601	13/01/2017	UTC support for CSV and Perception data export Display oil and cell temperature readings when "oil too hot" messages appears Recommendation messages when contamination is detected or filters need changed Location field added to CSV and Perception data export Diagnostic implemented based on RD-153 for Russian market Multi language support
v1.12.6.586	14/01/2016	Bug fixes including: Database export to CSV, Incorrect results after cancel during air purge, Restriction of list separator in transformer name, Rogers ratio negative values. Multi language support
v1.12.6.577	21/04/2015	Minor update for supported languages
v1.12.6.576	14/04/2015	Measurement performance update
v1.12.6.574	09/12/2014	Added weighted results and unit's serial to <export> section of log
v1.12.6.569	17/11/2014	Bug fixes including: Gas normalization for the system check Display latest system flush and leak test date and result
v1.12.6.567	10/11/2014	Export alarms to the perception by pga.csv file
v1.12.6.566	29/04/2014	Bug fixes including: Japanese input (English keyboard)

# Release Note

v1.12.6.565	02/04/2014	Bug fixes including: Values displayed in Perception
v1.12.6.564	05/12/2013	% SHL text was changed to "Flammability in air"
v1.12.6.563	26/09/2013	Saving of partial measured data into the logfile when measurement cancelled
v1.12.6.562	18/09/2013	Additional data added for the system check
v1.12.6.561	18/09/2013	PGA RevD support update Additional data added to the logfile
v1.12.6.560	17/09/2013	Chinese language support
v1.12.6.559	12/09/2013	Bug fixes including: Date and time reset
v1.12.6.558	12/09/2013	Bug fixes including: Minor sensor issue
v1.12.6.556	20/08/2013	Additional data for system check in Logfile
v1.12.6.555	21/06/2013	Multi language support
v1.12.6.554	19/06/2013	Added import csv file to the database option
v1.12.6.552	07/06/2013	Measurement performance update Additional data in Logfile Relative saturation report
v1.12.5.551	28/05/2013	Bug fixes including: Relative saturation calculation support for PGA revD
v1.12.5.549	24/05/2013	Gas normalization information added to the logfile
v1.12.5.548	18/01/2013	Display gas values down to 0.0ppm Total Hydrocarbon information
v1.12.5.547	06/12/2012	Portuguese language support
v1.12.5.546	20/11/2012	Czech language support
v1.12.5.545	01/11/2012	French, German, Japanese, Polish, Russian and Spanish language support
v1.12.5.544	30/10/2012	English and Chinese language support
v1.12.4.543	26/10/2012	General bug fixes
v1.12.4.542	22/10/2012	General bug fixes
v1.12.4.541	14/08/2012	Chinese language support for TDCG printout
v1.12.4.539	07/08/2012	Support for new printer (seiko)
v1.12.4.537	22/06/2012	Bug fixes including: Printer issue
v1.12.4.536	01/06/2012	Bug fixes including: System check results not displaying on system dialog
v1.12.4.534	07/11/2011	Measurement performance update
v1.12.4.531	15/08/2011	TDCG field added to pga.csv file (perception sync)
v1.12.4.528	12/08/2011	Kelman changed to GE4Service@ge.com
v1.12.4.526	01/06/2011	Bug fixes including: Release for water report
v1.12.4.524	27/05/2011	General bug fixes AutoRun modified for TransportPro/PerceptionSync
v1.12.4.518	15/03/2011	Translation of "Yes/No" button
v1.12.4.517	14/03/2011	General bug fixes
v1.12.4.514	27/10/2010	Multi language support

# Release Note

---

v1.12.4.512	22/11/2010	General bug fixes
v1.12.4.511	10/11/2010	General bug fixes
v1.12.4.510	09/11/2010	General bug fixes
v1.12.4.509	08/11/2010	General bug fixes
v1.12.4.508	03/11/2010	General bug fixes
